

Amendments to the Specification:

Please replace the paragraph beginning at page 8, line 15, with the following paragraph:

Referring to Fig. 5, retention post 58, shown partially by hidden lines, may include a base 68 and a neck 70. The circumference of base 68 may be greater than the circumference of neck 70. Receptacle 62 of blade 14 is sized to receive base 68. When base 68 is received within receptacle 62, and clamped within the side pieces of the handle via fastening mechanism 30, blade 14 is unable to slide off of post 58 because blade slot 60 is sized to prevent base 68 from passing through slot 60.
